STATE OF MONTANA
HIGHWAY COMMISSION
HELENA

July 16, 1945

Mr. H. W. Holmes State Highway Engineer,
Montana State Highway Department,
Helena, Montana.

Dear Mr. Holmes:

In accordance with G.A.M. No. 277, transmitted herewith, is the initial selection of the Federal-aid Secondary System for the State of Montana which is to be forwarded through the regular channels to the Public Roads Administration, Portland. This selection consists of the following data:

1. Seven sets of Tabulation of Routes selected.
2. Four state maps showing routes selected.
3. Four sets of $\frac{1}{4}$ " county traffic flow maps, showing routes selected by color, and their numbers.

The eighteen items listed in the Statement of Concept of Principles to be used in the Selection of a Secondary Highway System (March 1941) prepared by the PRA have been followed in all Secondary System submissions or studies made by Montana, these include the following:

1. Proposed Initial Secondary System (July 1941).
2. 10% Federal-aid Secondary System Study (August 1944).
3. Initial Selection Federal-aid Secondary System (July 1945).

The methods used in allocating mileage to the counties and selecting eligible routes were thoroughly discussed in the previous submissions. Consequently, it would be superfluous to go into detail again at this time.

A $\frac{1}{4}$ " General Highway and Transportation Traffic Flow Map was sent to each Board of County Commissioners with a letter requesting them to select

the roads in the county they wished placed on the Secondary System. On these maps had been shown the previously approved Routes on the Secondary System. In most cases the counties approved the previously selected routes but the remaining cases required another letter requesting approval. There were a few cases in which the counties did not agree with the previously approved routes, and therefore some of these routes are not being submitted at this time. Routes which had not been previously approved were then checked against the State's 10% Federal-aid Secondary Study and compared with the comments of the PRA regarding the State's selection. If all three agencies were in agreement, the route is being submitted for approval in this selection.

There are also being submitted routes on which State or Federal money has been spent in improving a section of road and which have been carried in the Road Log as "Other State Roads." These routes in some cases have not been requested by the counties, but are being submitted for approval by the State because of the investment the Federal Government and State have in the road due to previous construction. But it can be and is hereby stated that the counties have either now or previously approved all of the routes now being submitted.

The total of this submission consists of 2,873.8 net miles of road, which excludes the ineligible mileage within cities of 5,000 and over population. Of this total 1,707.2 miles have been previously approved, leaving the balance of 1,166.6 miles not previously approved.

The traffic bands on the county maps have been colored to make it easier to differentiate between the several systems. The Primary System has been colored green, the previously approved Secondary System has been colored red, and the balance of the present selection has been colored yellow. A state map with a scale of 1 inch = 10 miles was prepared, showing all routes on the Secondary System. This map also carried the route numbers as shown on the county maps.

Digitized by the Internet Archive
in 2015

The system of numbering the routes is a continuation of the system set up by the PRA when approving the Initial Federal-aid Secondary System submitted in 1941. The route numbers used in the Initial System but which were not approved by the PRA were assigned to the same routes if they reappear in this submission. Route numbers for routes which were not approved and which have not been selected in this submission have not been re-used.

Very truly yours,

M. J. Steere.

M. J. Steere
Traffic and Planning Engineer
Montana Highway Planning Survey
